

**FOR IMMEDIATE RELEASE**

### **ACOM Channels Division Announces Webinars for Sage Users; Focus on Cost Savings of Sage-Integrated Electronic Document Process Automation Solution**

LONG BEACH, California, July 31, 2009 – The Channels Division of ACOM Solutions, Inc. will launch a series of 30-minute webinars on August 12 for clients and prospects of Sage Software resellers, focusing on how the application of its EZContentManager with Sage Integration can extend the value delivered by the Sage VARs, by providing significant savings for end users through the [automation of accounts payable business processes](#).

EZContentManager is a modular [document management system](#) that allows small/medium size businesses to convert to a paper-less centralized electronic document management environment quickly and affordably, and to build it out with additional functional modules as business requirements grow and change.

The first session is scheduled for Wednesday, August 12, from 11:00-11:30 a.m. (PDT), with others to follow on Thursday, September 17 and Tuesday, September 22. For registration and additional information, visit <http://www.acom.com/channels/sageintegration.php>

“The tight, virtually transparent integration of EZContentManager with Sage’s software allows users to remain within the Sage environment while accessing and managing key documents,” said Senior Vice President James R. Scott. “User training is minimized, since common tasks such as viewing invoices or sales order documents, checking [document workflow and approval](#) statuses, or adding documents to a folder, are done by simply clicking a button on their Sage screen.”

The webinars compress a substantial amount of information into a relatively brief session, Scott said, including:

- How to save at least five minutes for each document filed or retrieved
- How to electronically route invoices/contracts/POs through the approval process
- How to save thousands of dollars in storage and delivery costs annually

- How to automate records retention
- How to ensure business continuity in case of disaster

“EZContentManager with Sage Integration is user-friendly, intuitive and easy to implement,” Scott said. “It offers an extremely fast pay-back with typical mid-size organizations saving as much as \$35,000 a year.”

Attendance at the webinars is open to Sage resellers and Sage end-users.

#### **About ACOM’s VAR Success Program**

ACOM’s VAR Success Program enables VARs to start generating leads and closing deals very quickly. The program includes a 4-step methodology, with a valuable set of unique Sales and Marketing support tools, including ACOM’s “Lead-Machine Webinars for VARs” (experts show you how to quickly turn your website into a lead machine); ACOM’s turnkey “Pay-per-Click in a Box” Program; “Ready-To-Go Marketing” campaigns; and ACOM’s “Crawl, Walk, Run” Phased Sales Training Program.

#### **About ACOM Solutions, Inc.**

For over 26 years, ACOM has been automating document and payment processes for more than 4,000 organizations, across all industries. ACOM develops solutions that are best suited for tactical deployments in the accounting/financial departments of mid-size organizations. ACOM’s solutions integrate seamlessly with any financial/ERP system to extend that system’s capabilities; they dramatically improve an organization’s efficiency by automating their previously manual/paper-based processes; and they significantly decrease an organization’s costs. Likewise, by incorporating ACOM’s solutions into their product offerings, ACOM’s partners can bring an additional set of important cost-saving enhancements to their customers.
