

For Immediate Release:

**ACOM's Electronic Medical Records Division Selects
World Wide Medical Services, Inc. to be a Referral Partner
in Marketing RAPID EMR Reporting Solution**

ST. PETERSBURG, Florida, February 14, 2005 – The Electronic Medical Records Division of ACOM Solutions, Inc., has entered into a partnership agreement with World Wide Medical Services, Inc., of Tampa, under which World Wide will assist ACOM in exposing the RAPID EMR medical diagnostic, reporting and document management solution to its extensive base of electro-medical technology users, it was announced today by ACOM Vice President Gregory T. Church and World Wide Medical Partner Larry Cuervo. RAPID EMR runs in the PC environment on desktop, laptop/notebook and tablet computers.

With more than 20 years experience in the medical profession, World Wide Medical Services provides professional services and devices for non-narcotic pain management and rehabilitation. RAPID EMR software eliminates paper note and report writing required of chiropractors and other health care providers, through use of editable intelligent fields and on-screen check-off boxes. It automates the recording of patient examination and treatment notes, and streamlines the production and management of reports to attorneys and insurance companies.

"RAPID EMR fulfills a need in the chiropractic community that grows more urgent every day," Cuervo said. "Most fees for health services are paid through third parties, who depend for their validation on the reports that are submitted. This is particularly the case in personal injury and rehabilitation. The quality of a report can mean the difference between fast reimbursement, multiple time-consuming submissions, and even the approval or denial of payments. RAPID EMR solves the quality problem by generating reports that are concise and consistent, and it reduces preparation time to minutes, versus hours, through its automated procedures. We have no hesitation in recommending ACOM and RAPID EMR to our clients."

World Wide Medical Service, Inc. maintains a rapidly growing nationwide clientele of practitioners, rehabilitation clinics and therapists, Cuervo said, with more being added each month in both chiropractic and other health care disciplines.

"We are extremely pleased to be partnering with this aggressive and knowledgeable company," Church said. "The need is great, the market is large and with partners like World Wide Medical Services, we will be able to address it more quickly and more effectively."

About World Wide Medical Services, Inc.

World Wide Medical Services, Inc. is a privately-held company based in Tampa, Florida, that has been an innovator in the electrotherapy field of medicine for the last 6 years, and combined experience in the medical profession accruing to more than 20 years. The company's goal is to provide prompt, professional service and products to physicians and their patients for effective non-narcotic pain management and rehabilitation through use of electro-medical therapy. About ACOM Solutions, Inc.

Headquartered in St. Petersburg, Florida, the ACOM Electronic Medical Records Division is part of ACOM Solutions, Inc. and was formed to develop diagnostic, reporting and document management solutions for chiropractors and related medical service providers. Its flagship product is RAPID EMR, a graphically oriented software solution that automates note-taking and the report-writing customarily required by insurance companies for payment of claims, as well as facilitates management of the documents. Now in its 22nd year of business, ACOM develops, markets and implements advanced modular software systems for e-document management, e-payment management, B2B e-commerce management, and e-purchasing management, domestically and through overseas partners. Corporate headquarters are in Long Beach, California, iSeries Division headquarters are in Duluth, Georgia, and regional offices are located in several major U.S. cities. For more information, phone 866-286-5315 or visit www.acom.com and www.acomemr.com.
