

Overview:

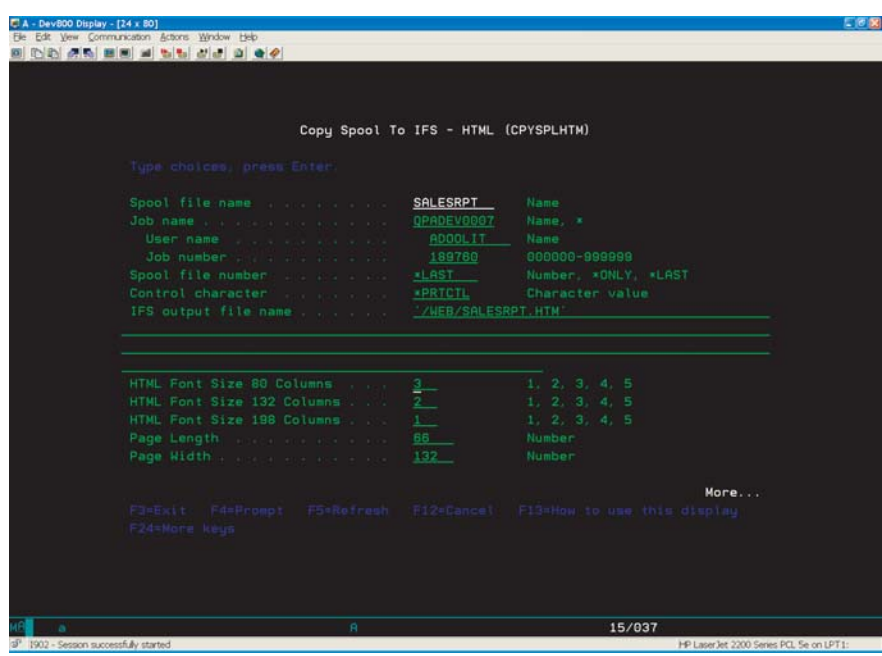

This new add-on module enables you to convert standard SCS spool files to RTF, HTML, ASCII, CSV. Once they are converted, they can be automatically placed on your IFS for retrieval. You can also convert AFP files to PDF and TIFF using this utility.

Features:

- Native iSeries application
- Spool files can be automatically converted and index fields pulled out
- Command line API's available for each converter
- Can be embedded in any CL or RPG program
- Spool files and reports can be automatically converted to ASCII, RTF, HTML or CSV

Benefits:

- Instant ROI by decreasing costs associated with printing and storing large spool files or redundant information
- Easy to use
- Makes spool files and reports easier to manage in native PC formats
- No special programming required

Minimum requirements:
OS version V4R5 or higher
