

- Secure
- Reduce Costs
- Compressed Emails
- Password Protection
- Versatility of Payments
- Automatic Payments

- Do you need to email documents as color, text-searchable PDF attachments with password protection?
- Are your customers asking you to send documents electronically?
- Would you like to reduce your mailing costs?
- Would you like to email documents (e.g., Purchase Orders, Invoices, Statements, Expense Reports, etc.) to your customers *directly from your iSeries (AS/400) machine?*

Now you can... with **EZeMail/400** solution! EZeMail/400 enables you to email any iSeries (AS/400) form or document... directly from your iSeries (AS/400) machine!

EZeMail/400 also enables you to edit, send, receive, display, print and track your email on any iSeries (AS/400) terminal or connected PC... through any mail server... over any network. **Reaching out has never been so EZ!**

Example of EZeMail/400 in action: Several of your customers have requested that you email all monthly invoices to them.

Benefits of Sending eMail Versus Mail:

- **Secure electronic file format...** compress and password protect.
- **Reduce mailing costs...** no postage, envelopes, or mailing labels required.
- **Reduce labor costs...** much faster to email than print, stuff & stamp.
- **Meet customer needs...** many companies prefer to receive documents electronically.

EZeMail/400 Solution Interfacing:

- When interfaced with ACOM's EZeDocs/400 eForms Solution, EZeMail/400 can convert all your EZeDocs/400 electronic forms into PDF documents, and you can email these important documents to your customers or partners! (EZeDocs/400 eForms allows you to print all forms to a laser printer, using blank paper, or to distribute multiple copies to multiple printers, all from your iSeries or AS/400 machine - see ACOM's EZeDocs/400 eForms Solution datasheet for more information.)

EZMail/400 Details:

- EZMail/400 can exchange email through any network mail server available to your iSeries (AS/400) (including Exchange Servers and Notes/Domino Servers), using a standard PC modem.
- The email module comes complete with a text editor for creating, editing, viewing and sending email messages on any iSeries terminal. It contains a spell checker and allows for embedded signatures. Email addresses can be hard-coded or come from our Address Book for sending emails to recipients, carbon copies and blind carbon copies.
- An embedded email command in a form-overlay allows for retrieval of email addresses from any spool file or data file, with up to 50 recipients each per To:, CC:, BCC:. This also allows for renaming of the attachment with a field generated by the spool file, as well as color, text-searchable PDF attachments.
- Password protection and compression allows for smaller and safer attachments to be sent. EZMail/400 is compliant with SMTP, and any iSeries spool file (along with merged EZDocs/400 forms) can be sent using this module.
- Embedded commands can be used, and API's are available for custom use of the email module.
- Distribute documents seamlessly with this native solution for faster delivery of important, sensitive documents. It can also be used as a stand-alone module outside of EZDocs/400 eForms module for sending standard spool files as text-searchable PDF's.
- Sent and failed email logs are available for resending and editing of emails.
- EZMail/400 is easy to install and maintain, and easy to use.

More ACOM Solutions for iSeries (AS/400) Environments:
