

**FOR IMMEDIATE RELEASE****Public Sector Agencies Choose ACOM for  
Payment and Document Management Solutions**

ATLANTA, Georgia, February 6, 2008 – With more than 150 implementations of its payment and [document management solutions](#) in municipalities, counties, and other government agencies, ACOM Solutions, Inc. added six more cities to its roster of public sector users in the closing weeks of 2007, it was announced today by Senior Vice President James R. Scott.

ACOM is one of the leading providers of payment and document management solutions for the iSeries/System i community, many members of which are government agencies. The ACOM family of products includes universal payment platforms for checks, direct deposit and both paper and electronic remittance advice; design and production solutions for all office documents in either paper or electronic format; [electronic content management systems](#); and EDI/XML solutions for electronic commerce.

Cities recently added to ACOM's public sector user community include:

- Battle Ground, Washington: a historic suburb of Portland-Vancouver, with a 2007 population of 16,240
- Emporia, Kansas: located in east central Kansas, the city is home to about 26,000 people and is the county seat of Lyons County
- Sandy Springs, Georgia: originally a rural village north of Atlanta, Sandy Springs is now Georgia's 7<sup>th</sup> largest city with a population of more than 85,000
- Johns Creek, Georgia: Not far from Sandy Springs, now has a population of more than 62,000
- Port Orange, Florida: In Volusia County, north of Tampa, Port Orange grew from only 3,800 people in 1970 to a present population of nearly 60,000
- Sugar Land, Texas: One of the fastest growing cities in the state with a population of 80,000, Sugar Land is part of the Houston-Sugar Land-Baytown metroplex. A former sugar plantation, it is still the headquarters and refinery site of Imperial Sugar

The communities have deployed ACOM's EZPayManager/400 and EZeDocs/400 in a variety of configurations, with most opting also for the Selected Access feature, which provides a high level of security over the [payment process security](#) through a combination of multi-level password protection and convenient, ready access to audit logs.

Most have also opted for ACOM's PC-resident EZDesigner/400, a drag-and-drop forms design tool that permits interactive exchange of document templates between PCs and the iSeries/System i computers for new form template design and template maintenance.

"The universal compatibility of our software solutions enables any community to migrate to best-practices back office operations at minimum time and expense," Scott said. "Seamless integration of our productivity solutions with powerful management software systems yields a best-of-breed solution for municipalities, counties and allied agencies, solving major bottlenecks in efficiency and productivity, and also resulting in significant operating economies.

"With taxpayer pressures a constant in government services, users find that with ACOM solutions they can meet public expectations without putting undue strain on their budgets – particularly in the kind of growth areas that most of these communities represent," Scott said.

**About ACOM Solutions, Inc.**

Now in its 25th year of business, ACOM Solutions, Inc. develops modular software systems for document output, document management, secure corporate payments, and B2B EDI/XML e-commerce applications, marketing them domestically and through overseas partners. Corporate headquarters are in Long Beach, California; System i Software Division headquarters are in Duluth, Georgia; and regional offices are located in several major U.S. cities.
