

FOR IMMEDIATE RELEASE**Tests Show Transition to Advanced Operating System
Easy For ACOM Payment and Document Solution Users**

ATLANTA, Georgia, March 18, 2008 – ACOM Solutions, Inc. completed tests of its EZPayManager/400 and EZeDocs/400 product suites with IBM's new i5/OS V6R1 operating system prior to its March release and confirmed that users of its productivity solutions and the associated modules will encounter no problems in upgrading to the new software release, it was announced today by Angela Doolittle, Corporate Product Manager.

"ACOM is excited about the release of i5/OS V6R1, with its optimized Java support and performance improvements," Doolittle said. "Our native solutions have been tested with V6R1 and we are pleased to state that everything is working as designed. Our products remain ServerProven and the transition to V6R1 for our customers should be an easy one."

EZPayManager/400 enables companies to establish universal [payment management](#) environments that employ MICR laser checks, electronic payments (ACH), and options for printed, faxed, or emailed remittance advice in any combination. EZeDocs/400 allows them to create electronic templates for any document with the interactive EZDesigner/400 drag-and-drop design tool, store the templates in the EZeDocs/400 software, merge them with data for batch or single document production, and distribute them as laser printed or electronic documents.

"We are delighted to continue providing these widely accepted, award-winning productivity solutions to the iSeries/System i community," Doolittle said. "The advancements that have been released in V6R1 can only add to the effectiveness of our solutions in the i5/OS software environment, and we are pleased to again assert our commitment to the users of these reliable, high-performance and extremely flexible platforms."

About ACOM Solutions, Inc.
