

EZPayManager/400*

Laser Checks Module

Extend your Back Office Payment Process... and Reduce your Back Office Costs

EZPayManager/400 (EZPM/400) check processing software provides you with total control and versatility for back office payments (such as payroll, accounts payables, etc.). You can create electronic check templates, and then electronically merge these templates with your financial/ERP data, in order to print MICR laser checks and remittance advices (or pay stubs), using blank security check stock and a MICR laser printer. EZPM/400 incorporates state-of-the-art features for creating professional results, and advanced security features for your peace of mind.

EZPM/400 helps answer some primary questions for payment operations:

■ *How can I reduce my per-payment costs?*

EZPM/400 eliminates many of the personnel, equipment and maintenance costs associated with conventional disbursement processing -- and likewise reduces check costs up to 75 percent.

■ *How can I reduce the risk of check fraud?*

EZPM/400 eliminates preprinted check stock, greatly reducing your exposure to forged checks. In addition, extensive security features are built into our system to protect your company's data and to limit your liability to check fraud.

■ *How can my people become more productive?*

EZPM/400 simplifies the disbursement process by eliminating many of the manual steps associated with conventional payment methods (such as bursting, decollating, sorting, signing, etc).

■ *How can I afford the best solution?*

EZPM/400 vastly extends the productivity of your current disbursement processing, and quickly justifies the investment, by producing cost savings on printing, personnel expense, supplies and overhead. In addition, it's modular structure lets you start with the basics, and add capabilities as your requirements change. EZPayManager/400 is the advanced payments solution that can answer your current & future needs.

Advantages of EZPayManager/400

- Native iSeries (AS/400) software.
- Prints checks on-demand, as required, when required.
- Uses the same security check stock for all accounts.
- Provides true seamless interface to your applications.
- Configured to remain "transparent" to users with no additional steps.
- Integrates with all financial/ERP software.
- Eliminates the need to use outside printing companies.
- Provides easy-to-use GUI Design Tool.
- Enables changes document layouts in a matter of minutes.

Security Features

- Check Fraud Alert Module (Positive Pay)
- Signature Control for over/under amounts
- Secure software storage of all company information, graphics, logos, MICR fonts & signature on a removable PCMCIA card.
