

The Electronic Printing Solution for your Competitive Edge

EZeDocs/400 eForms solution provides you with ultimate control. Design and print your back-office business forms on-demand as required, when required. Merge data directly from multiple spool files on your iSeries (AS/400) into invoices, purchase orders, packing slips, statements, and other essential documents. You can use virtually any laser printer. You need not modify any existing software. The applications for your business are essentially limitless.

BENEFITS

- Native iSeries (AS/400) software, which eliminates the extra step of downloading files to a PC.
- Eliminates the need for outside printing companies.
- Eliminates inventory of pre-printed forms.
- Provides true seamless interface to your financial applications.
- Improves speed and efficiency by using laser printers instead of impact printers.
- Enables changes document layout in a matter of minutes.
- Typically configured to remain "transparent" to users with no extra steps.
- Makes spool changes easy - without application modifications.
- Streamlines workflow with distributed printing.
- Integrates with iSeries (AS/400) software applications.

The IBM Business Partner emblem is a registered trademark of IBM Corporation in the U.S., other countries, or both.

EZDesigner/400... a 32-bit Windows-based Graphical User Interface... for the Initial Design of Documents

- Design documents using an easy-to-use Windows program.
- Preview completed documents on screen, WYSIWYG.**
- Map the spool file for data file on the PC to the designed document, then upload the document to the iSeries, quickly and easily. Mapping can be completed via split screens in the GUI.)
- Exchange document designs seamlessly, interactively between your iSeries (AS/400) and the EZDesigner/400 host PC.
- Once the document has gone through the initial design, you can then use the forms directly from your iSeries (AS/400).

* Formerly known as **EZ**Print/400

** WYSIWYG = What You See Is What You Get

EZeDocs/400 Product Information

Leading Edge Performance, Features and Capabilities:

- Print all forms to a single printer or distribute multiple copies to multiple printers, all from your iSeries (AS/400)
- Batch printing module (send multiple formats, from same print job)
- Multiple printer support (create auto-split print file to multiple printers)
- Integrates with fax and email solutions
- Barcode support
- Auto Start Capabilities (merge specific form types to correct spool file without user involvement)
- Conditional printing (form layout based on spool file data)
- Foreign language support
- SAA / CUA compliant

Printer Connectivity Supported

- Parallel attachment via PC support or Client Access from your iSeries (AS/400) direct or remote connect.
- Network connectivity including Ethernet support.
- Printer sharing with PC/LAN applications is also supported.

- BPCS
- HTE
- Jack Henry
- JD Edwards
- MAPICS
- SAP
- Custom & In-House Solutions
- daly.commerce
- Infinium
- GEAC
- Lawson
- MARCAM
- SSA

AutoCollating

The AutoCollating feature of EZeDocs/400 enables you to merge multiple spool files with multiple forms all in a single print run. For example: an insurance company needs to send a whole set of customers similar policy forms but different riders. Simply merge the different forms with multiple spool data files in the same print run, and EZeDocs/400 sorts and collates the documents by policy number on the fly.

The IBM Business Partner emblem is a registered trademark of IBM Corporation in the U.S., other countries, or both.

Practical Usage of EZeDocs/400

- Distribution
 - Picking Slips
 - Packing Slips
 - Bills of Lading
 - RMA Documents
