

- Are your customers asking you to send documents electronically?
- Would you like to reduce your mailing costs?
- Would you like to e-mail documents (e.g., Purchase Orders, Invoices, Statements, Expense Reports, etc.) to your customers *directly from your iSeries (AS/400) machine?*

Now you can... with **EZeDocs/400 eMail** solution! EZeDocs/400 eMail software enables you to e-mail any iSeries (AS/400) form or document... directly from your iSeries (AS/400) machine!

EZeDocs/400 eMail solution also enables you to edit, send, receive, display, print and track your e-mail on any iSeries (AS/400) terminal or connected PC... through any mail server... over any network. **Reaching out has never been so EZ!**

EXAMPLE: Several of your customers have requested that you e-mail all monthly invoices to them.

Benefits of Sending E-mail Versus Mail:

- **Reduced mailing costs...** no postage, envelopes, or mailing labels required.
- **Reduced labor costs...** much faster to e-mail than print, stuff & stamp.
- **Meet customer needs...** many companies prefer to receive documents electronically.

EZeDocs/400 eMail Solution Interfacing:

- When interfaced with ACOM's EZeDocs/400 eForms Solution, EZeDocs/400 eMail can convert all your EZeDocs/400 electronic forms into PDF documents, and you can e-mail these important documents to your customers or partners! (EZeDocs/400 eForms allows you to print all forms to a laser printer, using blank paper, or to distribute multiple copies to multiple printers, all from your iSeries or AS/400 machine - see ACOM's EZeDocs/400 eForms Solution datasheet for more information.)

** PDF = Portable Document Format

EZeDocs/400 eMail Solution Details:

EZeDocs/400 eMail can exchange e-mail through any network mail server available to your iSeries (AS/400) (including Exchange Servers and Notes/Domino Servers), using a standard PC modem.

The software comes complete with a text editor for creating, editing, and viewing e-mail messages on any iSeries (AS/400) terminal. It has a spell checker for 7 different languages. It also contains a phonebook for saving and retrieving e-mail addresses and address lists.

EZeDocs/400 eMail is compliant with SMTP/MIME and POP3, which allows multiple attachments to be sent and received with your messages. Any iSeries (AS/400) objects, including physical files, source files, spool files, and save files, can be prepared as attachments and exchanged with anyone on the Internet. PC-type objects can also be sent and received, through the iSeries (AS/400) Shared Folders.

Mailboxes for each user or for groups of users may be created by an administrator. Inbound mail is automatically routed to the appropriate mailbox using routing tables. A mailbox titled POSTMASTER is given all mail that cannot be routed properly. The Postmaster can view and route them appropriately.

Users can copy or route their messages to other mailboxes or to categories they set up within their own mailbox. Messages can be marked as personal (which are completely private) or confidential (which will only allow security administrators to access them).

EZeDocs/400 eMail utilizes the power of the iSeries (AS/400) database to build a set of index cards that instantly sorts itself in a thousand different ways. You can use it to keep track of a wide variety of information, including e-mail addresses.

It can be used to keep track of company and contact names, phone numbers, sales information, or anything to which you would like to have quick access.

The IBM Business Partner emblem is a registered trademark of IBM Corporation in the U.S., other countries, or both.

EZeDocs/400 eMail works by entering information on cards, with up to a thousand lines per card, a million cards per file, and an unlimited number of files. EZeDocs/400 eMail can store rigidly structured data, or free-form information such as notes and comments, both on the same cards. You can organize any data the way you want it, on the fly, without any programming.

About ACOM Solutions, Inc:

ACOM develops solutions that integrate with enterprise applications to enhance back-office and B2B processes for electronic, Internet and paper-based commerce. ACOM solutions run in all computing environments (host-resident on iSeries, AS/400, and Windows NT computers), and are compatible with all financial management/ERP applications. Solutions include:

- Software solutions to create and print business/financial forms, checks, and barcode labels
- Software/Hardware solutions to print MICR laser forms and checks
