Div. of BESCORP, Inc.

FD 6100

FOR FOLDING & INSERTING

Standard Features

- Two fully automatic sheet feeders
- One automatic insert/BRE feeder
- Fully automatic adjustments
- Nine programmable fold applications
- User friendly display for easy set-up and operation
- Clamshell design for easy access
- Folds and inserts up to 14" length documents
- Double document detection
- Resettable counter provides accurate count of forms processed
- Seal and non-seal capabilities
- Fold Types - Letter and Double Parallel

Abilities:

Automatic

- One sheet folded and inserted
- One sheet folded, return envelope nested and inserted
- Two sheets collated, folded and inserted
- Two sheets collated, folded, return envelope nested and inserted
- Folding only without inserting

Semi-Automatic

- Up to five sheets (20# stock each), stapled or unstapled, folded and inserted

Options:

- Cabinet
- Mailing Machine Interface
- 400 Series Jogger - Reduces static electricity from forms and aligns them for proper feeding

The Everyday Mailing Solution

The FD 6100 inserter makes it possible for any business to automate their mailings. The affordability of this inserter eliminates the need to send out tens of thousands of mail pieces in order to justify the cost of automation. With the FD 6100, any size company can enjoy the benefits of automated folding and inserting.

Quiet operation and a compact, desktop design fits any office environment. A large, clearly marked control panel with step-by-step instructions easily guides operators through setup and operation. Up to nine jobs can be programmed so that recurring and frequent jobs can be processed with the push of a button.

Don't waste any more valuable time and money manually folding and inserting. Automate your mailings with the FD 6100 and maximize your company's efficiency.

Flexible

The FD 6100 can process a variety of documents up to 14" in length, including checks, invoices, newsletters and business reply envelopes. Two sheet feeders and one insert/BRE feeder allow for a number of jobs to be automatically processed including; 1 sheet, 1 sheet and a BRE, 2 sheets, or 2 sheets and a BRE. The FD 6100 multiple feed stations allow you to make your single sheet mailings "work for you" by using the second feeder to insert a direct marketing piece.

Compact and Powerful

The FD 6100 folds and inserts at speeds up to 23 pieces per minute and can hold up to 100 sheets/inserts in each feeder. The semi-automatic mode folds up to five stapled or unstapled sheets of 20# paper in one motion. The document feeder swap mode maximizes output by filling both sheet feeders with the same documents. When the first feeder empties, the second automatically starts feeding without interruption. This feature allows for a total sheet feeder capacity of up to 200 sheets.

Secure

Automating saves time, money and reduces the amount of handling, making the document more secure. To ensure the integrity of mailings, the FD 6100 has a double document detector that will automatically detect doubles and other potential misfeeds.

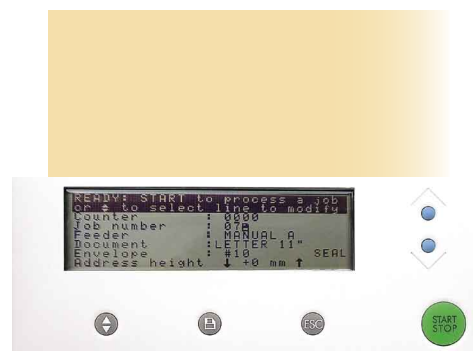

Easy to Operate

The FD 6100 is designed for anyone to use. The large, clearly marked control panel gives step-by-step prompts and guidance. To make operation even easier, up to nine frequent and recurring jobs can be programmed for access with the touch of a button. A user friendly drop-in feed system and clamshell design for easy access to the paper path add to the simplicity of operation.

Specifications:

Hopper Capacity:	Up to 100 sheets in each sheet feeder (20#) Up to 100 inserts/BRE's in the insert feeder Up to 100 outgoing envelopes
Fixed Speed:	Up to 23 pieces per minute
